

Autism Initiative: Training Series

Table of Contents

CORE CURRICULUM MODULES

Module 1: Overview of Autism in Adolescents and Adults

- Chapter 1.1 Introduction to Autism..... 1
Reviews basic information about autism and what is currently known about prevalence rates and causal factors.
- Chapter 1.2 Specific Deficits in Autism..... 7
Introduces the core deficits and associated features present in individuals with autism. These deficits and features will then be tied to the changes across development, specifically focusing on symptom presentations in adolescents and adults.
- Chapter 1.3 Comorbidity..... 14
Reviews the issues of comorbidity and differentiation of autism from other disorders.

Module 2: Key Components in Residential Service Provision

- Chapter 2.1 Staff Stress and Stress Management
Presents the key components of stress and burnout, what effective coping mechanisms are, and what resources are available to staff including communication with supervisors.
 - Part 1: Key Components of Stress and Burnout..... 19
 - Part 2: Effective Coping Mechanisms..... 25
- Chapter 2.2 Functional Behavioral Assessment
Presents information about Functional Analyses including how, why and when to use them for improving communication about behaviors and developing intervention strategies.
 - Part 1: Enhancing Staff Communication using Functional Behavioral Assessments..... 32
 - Part 2: Advanced Clinical Applications of Functional Behavioral Assessments..... 40
- Chapter 2.3 Core Elements for Enhancing Quality of Life..... 45
Presents the core components for enhancing quality of life, including replacement of problematic behaviors with more adaptive behaviors and measuring individual and family perspectives on subjective quality of life.
- Chapter 2.4 Social Networks and Personal Choice..... 51
Expands discussion of personal choice to include religious, family, and social network preferences.

Module 3: Skill Development and Learning for Life

- Chapter 3.1 How Individuals with Autism Learn and Adapt..... 57
Defines evidence-based interventions and how information is obtained for effective treatment planning.
- Chapter 3.2 Basic Components of Effective Skill Development
Reviews the basic behavioral principles that can be applied to promote motivation, create skill development sequences, and promote skill utilization.
 - Part 1: Positive and Negative Reinforcement..... 64
 - Part 2: Deceleration: Issues and Terminology..... 71
 - Part 3: Extinction..... 77

Autism Initiative: Training Series

• Part 4: Token Economy.....	81
• Part 5: Stimulus Control and Establishing Operations.....	85
• Part 6: Prompting.....	90
• Part 7: Fading.....	95
• Part 8: Shaping.....	100
• Part 9: Task Analysis and Chaining.....	105
• Part 10: Generalization and Maintenance.....	110
• Chapter 3.3 Additional Supports for Skill Development	
Summarizes structural, visual, and transitional supports that serve to promote further development of acquired skills.	
• Part 1: Structural and Visual Supports.....	115
• Part 2: Schedules and Transitional Supports.....	124
<u>Module 4: Monitoring and Evaluating Individual Progress</u>	
• Chapter 4.1 Monitoring and Evaluating.....	134
Explains the methods for defining behavior, writing program goals, and issues of reliability that must be considered for collecting data.	
• Chapter 4.2 Evaluation Methods, Practice, and Feedback.....	142
Reviews the importance of practicing data collection with appropriate feedback and presents examples of effective means to do so.	
• Chapter 4.3 Individualization of Program Goals and Behavioral Supports.....	149
Provides the definition and rationale for individualization of behavioral supports, as well as elaborating and summarizing the construction of individual plans based on all skills introduced throughout the training series.	

KEYSTONE GUEST LECTURE MODULES

Module 5: Communication in Social Interaction

• Chapter 5.1 Conceptual Introduction	
Introduces the concept of effective communication as a key component for enhancing quality of life. This will include a full description of what it means to support intentional, functional, and spontaneous communication in a treatment service setting.	
• Part 1: Effective Communication and Quality of Life.....	156
• Part 2: Supporting Functional, Intentional and Spontaneous Communication.....	161
• Chapter 5.2 Strategies for Intervention	
Provides a description of functional speech and the use of augmentative and alternative communication methods, including back-up methods for communication and the complexity of human language.	
• Part 1: Functional Speech and Augmentative Communication.....	166
• Part 2: Expanding Vocabulary.....	171

Autism Initiative: Training Series

- Chapter 5.3 Programmatic Issues

Highlights concerns regarding speech, language, and communication skills for adolescents and adults with autism, specifically focusing on the lack of initiative in communication and related social skill deficits. Also, effective scheduling and types of communication program goals are described and presented.

- Part 1: Challenges Implementing Communication Programs..... 176
- Part 2: Common Barriers in the Development of Communication..... 181
- Part 3: Communication Fluency..... 186

Module 6: Issues in Relationships and Sexuality

- Chapter 6.1 Conceptual Introduction..... 191

Introduces the critical issues in teaching knowledge of sexuality and relationships, both historically and in recent practice, for adolescents and adults with autism, including how these factors are related to an individual's quality of life.

- Chapter 6.2 Strategies for Intervention

Reviews some of the social deficits that impact learning about sexuality and relationships for adolescents and adults with autism. Specific recommendations are given regarding effective ways to teach individuals to seek help, navigate their work environment, and be more effective at self-advocacy regarding their rights as transitioning adults.

- Part 1: Skill Building..... 196
- Part 2: Functional Transition Programming..... 200

- Chapter 6.3 Programmatic Issues

Reviews some difficulties that can occur when implementing instructional strategies regarding sexuality and intimate relationships with individuals with autism. This includes a review of considerations regarding an individual's ability to understand language and social exchange, as well as a presentation of specific recommendations regarding methods to teach skills to promote safety and competency in adolescents and adults with autism.

- Part 1: Social Skills Deficits and Sexuality..... 204
- Part 2: Generalizing Skills Across Settings..... 209

SELF-ASSESSMENT OF MATERIALS

Self-Assessments.....	216 - 257
Self-Assessment Answer Keys.....	258 - 260

TRAINING ACTIVITIES

- Chapter 1.2: Specific Deficits in Autism Programmatic Issues..... 261
- Chapter 2.1 Staff Stress and Stress Management
 - Part 1: Key Components of Stress and Burnout..... 263
 - Part 2: Effective Coping Mechanisms..... 264
- Chapter 2.2: Functional Behavioral Assessment
 - Part 1: Enhancing Staff Communication using Functional Behavioral Assessments..... 265

Autism Initiative: Training Series

- Chapter 2.3 Core Elements for Enhancing Quality of Life..... 267
- Chapter 2.4 Social Networks and Personal Choice..... 268
- Chapter 3.2 Basic Components of Effective Skill Development
 - Part 1: Positive and Negative Reinforcement..... 270
 - Part 2: Deceleration: Issues and Terminology..... 272
 - Part 3: Extinction..... 275
 - Part 4: Token Economy..... 277
 - Part 5: Stimulus Control and Establishing Operations..... 279
 - Part 6: Prompting..... 280
 - Part 7: Fading..... 282
 - Part 8: Shaping..... 283
 - Part 9: Task Analysis and Chaining..... 285
 - Part 10: Generalization and Maintenance..... 287
- Chapter 3.3 Additional Supports for Skill Development
 - Part 1: Structural and Visual Supports..... 289
 - Part 2: Schedules and Transitional Supports..... 290
- Chapter 4.1 Monitoring and Evaluating..... 291
- Chapter 4.2 Evaluation Methods, Practice, and Feedback..... 293
