February 26, 2009

Dear Provider:

It has come to our attention that the New York State Department of Health will be implementing an edit in the eMedNY Medicaid payment system that will require a valid CPT/HCPCS procedure code for all clinic claims submitted. Since Day Treatment services are included under the clinic Category of Service (0160), these claims will be affected when the edit is implemented. As a comprehensive day service with an integrated clinical component, there are no standard CPT/HCPCS codes that adequately describe day treatment services.

This correspondence is being sent to instruct your agency of a required revenue code that must be utilized to bypass the CPT/HCPCS procedure code edit. **The appropriate revenue code that should be used effective 3/26/2009 for all day treatment services submitted to the eMedNY is 0942.** Upon implementation of this new edit, claims may be denied if this revenue code is not utilized.

Please share this information with staff in your billing department. If your agency has questions concerning this new requirement, please contact Debbie Langdon or Matt Breslin at (518) 402-4333.

Sincerely,

A handwritten signature in black ink that reads "Karla J. Smith".

Karla J. Smith
Director of Central Operations
